BECOME AN ENGINEER OF BUSINESS

GAIN A COMPETITIVE EDGE IN A HIGH-DEMAND MARKET

Supply chain management professionals are the engineers of business. Products and services are becoming more complex to manage as they become more globally integrated and reliant on technology. Rooted in the strong technological and analytical traditions of Saunders College of Business at RIT, MS in global supply chain management is an interdisciplinary program that integrates concepts from supply chain, operation management, analytics, industrial engineering, global business, and management.

This program provides students with global supply chain knowledge that is reinforced by **strong analytical, quantitative, and leadership skills** needed to design innovative solutions and predict future trends, and to become leaders in the fast-moving business landscapes in the global supply chain system.

PROGRAM FEATURES

- Hands-on, Project-Oriented Coursework
- F-1 OPT STEM 24-Month Work Extension
- Integrated Supply Chain, Globalization and Managerial Skills
- State-of-the-Art Analytics and Supply Chain Methodologies

“As e-commerce and online platforms gradually dominate modern economies and virtual realities attempt to connect both online and offline worlds, global supply chain management has never become more important - and its importance will only grow in the foreseeable future. The MS in GSCM program integrates the essential supply chain, globalization process and analytics, and managerial skills that a successful SCM manager would need in mobilizing global resources to improve the value chain in today’s economy.”

Zhi Tang, Ph. D.,
Professor, Management
Director of MS in Global Supply Chain Management and MS in Entrepreneurship & Innovation Programs

“My time spent at Saunders was extremely beneficial in preparing me with analytical and critical thinking skills that I can apply throughout my career.”

Thomas Higgins
MS in Management, Global Supply Chain Track
Production Planner

“The MS in global supply chain management curriculum does an excellent job combining interpersonal and technology management skills. In addition, the global emphasis is extremely applicable throughout the supply chain industry and has become a difference maker for nearly all organizations. Throughout my career in supply chain I have seen firsthand how quickly the industry adapts to change and feel that the new MS in global supply chain program sets up leaders for success in their careers.”
